

PULSE

PRECISION, SAFETY, CONTROL.

PULSE

Pulse is the console designed for the most demanding permanent makeup, paramedical dermopigmentation, tricological micropigmentation, derma needling, and artistic tattoo professionals.

The most distinguished experts in the industry have tested and contributed to the development of Pulse, a system designed to ensure full control and absolute performances of the dermopigmentation process and the utmost safety for both the client and professional.

PULSE IS THE TOTAL SOLUTION FOR THE PROFESSIONAL:

- ✓ PARAMEDICAL DERMOPIGMENTATION
- ✓ TRICOLOGICAL MICROPIGMENTATION
- ✓ DERMANEEDLING
- ✓ ARTISTIC TATTOO

EXTEND YOUR STYLE

DIGITAL SPEED PULSE

Pulse improves the work experience thanks to its simplicity of use and setting. The console has a luminous screen and touch-screen practical and intuitive.

A technologically advanced software with 5 proposed treatment programs, within which it is possible to infinitely adjust the power and speed of the beat for each application of dermopigmentation.

+ POWER
+ PRECISION
- PAIN

LIMITLESS POWER AND PERFORMANCE

Pulse's revolutionary technology eliminates the problem of electrical impedance associated with traditional devices.

Experience a new sensation of power and maximum control, for works which are almost painless, minimal skin lesions and maximum pigment deposit after only one session.

LIMITLESS CONTROL

DOUBLE PULSE CONTROL

Clinita Pulse is equipped with two power ports for configuring two completely independent handpieces, considerably reducing setting-up time during treatment and enabling a combination of techniques. A single device for a wide range of applications: from the most delicate permanent makeup, to the most complex artistic tattoo or reconstructive medical treatment.

CLEANING

CLEANING

Digital glass touch-screen display mounted on a single unit made of aeronautical aluminium alloy, which is satin polished, lightweight, easy to clean and resistant to corrosion and oxidation.

WARRANTY

3 years limited warranty.

We offer warranty extension programs on the dermograph and the console up to 3 years; this is the proof of the extreme reliability and robustness of the Clinita device.

ENGINEERED IN ITALY

Pulse is the result of a proudly Italian concept and design.

DERMOGRAPHERS

HIGH TECHNOLOGY AND EXTREME COMFORT.

PERPETUAL GRIP

I-SAFE

An extremely professional device which caters to the needs of both the most demanding professionals and those looking for a user-friendly device to develop and improve their performance.

Medical device.

The only dermograph for permanent makeup, corrective and artistic tattoos that meets the requirements for certification as a medical device.

AUTOCLAVEABLE

The only completely autoclavable dermatograph with a rotative-propulsive movement to guarantee maximum sterility.

SCREW-IN

The patented "Screw-In" docking system engine handpiece is sterilizable and autoclavable, hermetically isolating the engine from any risk of contamination.

NOISELESS

Eccentric made of medical autolubricant material resistant to the most extreme solicitations, acoustic insulation of the transmission shaft, last generation motor in continuous cycle, are some of the solutions that make Clinita's handpieces the most silent on the market.

PRATICAL

Special mechanism for infinitesimal needle output settings. Quick hooking system for Clinita needle cartridges.

PERPETUAL GRIP

Patented Cam "PERPETUAL GRIP", avoiding the power losses of traditional cams. NO flickers, MORE stability, NO vibrations, MORE precision.

PAINLESS

The innovative design of the handpiece transmission, the calibrated needle excursion, allow treatments in the absence of pain, avoiding the possible application of analgesics. This allows less stress on the skin, absence of bleeding, better color retention with a considerable reduction in healing times.

LATEST GENERATION BRUSH-LESS MOTOR

Why use BRUSH-LESS ENGINES? A power to weight ratio that's up to six times better than traditional "brushed" devices; full power at all RPM.

POWERFUL HEART

I-ONE

Pen dermograph for Permanent Make-Up, Trichological Pigmentation and Microneedling operated with needle cartridges

Powerful heart.

5W power Maxon micro-motor, no vibrations and low noise.

The lightest.

The smallest, lightest handpiece ever.

SAFE

Dermographeur equipped with a special membrane on the transmission shaft which completely insulates the pen and prevents contamination with the needle or cartridge.

PRATICAL

Special mechanism for infinitesimal needle output settings. Quick hooking system for Clinita needle cartridges.

TRICOLOGICAL MICROPIGMENTATION

Specific program developed for Trichological Pigmentation

DERMANEEDLING

The machine software has special calibration settings enabling MICRO NEEDLING execution with the utmost precision and highest performance. This Dermographeur requires two needles specifically conceived for micro needling, one with nanotechnology.

COMFORTABLE

The handle is comfortable, ergonomic and designed for the ideal grip, but thick enough to avoid occupational diseases. The perfect balance prevents hand fatigue even after multiple hours of work.

PERFORMANCE COMFORT

I-PROFI

I-Profi supports professionals in the early stages of their career while enabling experienced operators to be creative and customize their work.

PERFORMANCE

High power and beat speed per minute (maximum 25,000 rpm). Accurate and almost painless results make I-Profi ideal for very delicate skin.

PRECISION

The very light handpiece is equipped with a ring with infinitesimal control that enables operators to keep the needle's output stable and precise for extremely accurate work and operators' comfort even during long sessions.

COMFORTABLE

The handle is comfortable, ergonomic and designed for the ideal grip, but thick enough to avoid occupational diseases. The perfect balance prevents hand fatigue even after multiple hours of work.

PRATICAL

Special mechanism for infinitesimal needle output settings. Quick hooking system for Clinita needle cartridges.
